

# Everyone has a family, whether we're constantly surrounded by it or it's just our point of origin

In the run up to 2018, we felt it was time once again to give the family an airing; to let our family members speak their mind and tell us how they'd like to evolve. But we did not stick to our ambition of focusing solely on family growth and family refinement this year either. More than one brilliant new personality turned up who wanted to move in with us... and of course they were welcome!

## BOB

**Design:** Borselius & Bernstrand 2017 - 2018

BOB, one of the latest members of the family, has always cherished ambitions about his future. Bob knows what Bob can do – all we had to do was let him take charge of his own success. Five upholstered sections soon became seven, which means endless alternative combinations. These days, BOB can curve in or out or both at once. We can fit power outlets and USBs into the seats if you want, while add-ons like the CUT sofa tray and the JACK table maximize possibilities. Last but not least, we can provide a base for BOB for all those surroundings and functions where you need to sit a little higher.

## CUT

**Design:** Borselius & Bernstrand 2018

Cut, the new add-on table can be attached between the modular elements of BOB. Cut is made in aluminum and steel and makes BOB even more versatile.

## JACK

**Design:** Borselius & Bernstrand 2018

Jack will multiply any wall outlet. Just connect Jack, and you will have USB- as well as standard electric connections on the cone-formed base of the table. Jack can connect to Bob, which offer elements with electric outlets, or can be used as a freestanding table.

## DENT LOUNGE

Design: o4i 2018

From a distance, the new Dent easy chair looks like it's sculpted in clay. When you sit on it, it's all soft, enveloping leather. The new addition to the Dent family by o4i (office for ideas), keeps the original three-dimensional surface in ordinary veneer, but now with a large generous "dressed" seat shell fixed on a swivel frame. "We have stretched the curvature even more," says Henrik Kjellberg, who together with Jon Lindström designed the original Dent chair in 2013, "and it works perfectly!"

## GAP

Design: Osko + Deichmann 2018

"How can we make the world a little bit different?" asked Olli Deichmann; "how about a stackable, 4-cross frame chair?" And Blasius Osko was of course all for it: "Let's make something original and elegant for sophisticated hospitality!" The gap is that little detail that lends Olli Deichmann's and Blasius Oskos' swivel chair such straightforward functionality. Both the Gap chair and the Gap table are easily stacked away when it's time to make space or clean public places like cafeterias, restaurants, and conference areas. Or just slot the chair in place under any table using the simple table accessory. The Gap chair offers stylish seating with a layer-glued veneer available in ash, oak, walnut, or black. Both chair and table sport a frame of lacquered steel.

## DENT WOOD BAR

Design: o4i 2018

Dent adds a human touch to contemporary clean and overly strict architecture, while questioning the modernist heritage where the straight and meticulously polished are the norm. "Dent's uncontrolled flow of shapes offers a contrast to interior spaces that are often experienced as being way too perfect. Even the architecture comes alive in the presence of Dent." At first glance, Dent might appear uncomfortable, but the curving shape is well adapted to the human body where it really counts. This upholstered version is available in fabric or leather with a classic swivel frame base. The original Dent is also available with or without "dressed" seat shells as chairs and bar chairs, all with a choice of frames in steel or wood.

## GAP TABLE

Design: Osko + Deichmann 2018

Both the Gap chair and the Gap table are easily stacked away when it's time to make space or clean public places like cafeterias, restaurants, and conference areas. The gap is that little detail that lends Olli Deichmann's and Blasius Oskos' swivel chair and table such straightforward functionality. Gap table is available in solid wood, or with a veneer surface. Both chair and table sport a frame of lacquered steel.

## DUDNRA HIGH BACK

**Design:** Stefan Borselius 2018

The Dundra family just couldn't do without another, even more stylish easy chair. The high backrest ensures relaxed comfort, and the swivel cross-frame allows for movement even when resting your legs on the footstool. Stefan Borselius has once again produced a contemporary, almost classic feeling, with the covered button as his distinct hallmark. The high backrest welcomes the short and the tall without compromise, and full head support allows both relaxation and reading. The Dundra easy chair comes in fabric or optional leather with the molded foam padding supported by nozaq springs.

## BOB BETONG

**Design:** Borselius & Bernstrand 2018

Ever since its successful launch in 2017 BOB has been waiting to go outdoors. We are proud to announce the free flowing sofa for indoor use now has been adapted to all seasons in a close collaboration between Blå Station and Starka, another family business in Skåne, which has 80 years of experience in the manufacture of concrete for special applications. The heavy-duty version called BOB Betong will furnish public spaces all around the city with generous seating for everyone.

## STOVE

**Design:** Gabriel Tan 2017

Developed in the Furnishing Utopia project where designers from around the world were again given the task of interpreting Shaker design, Stove is a small stool for all those occasions when a stool is essential. Place it wherever you want or hang it up if it gets in the way. Or hang loads of them on the wall to take down as people come and go. Neat, functional, perfectly comfortable and terribly beautiful.

## SUPERSTRAW

**Design:** Osko + Deichmann 2015 - 2017

If the Superkink by Osko + Deichmann can offer soft padded comfort, why not add it to the Straw family? Superstraw, both as a stackable chair and as a high barstool, now comes with padded seats covered in fabric or leather. The angular frames with their kinked tubes might beg the question: will they break? But, of course, Germans are quite incapable of making things that do not work.

## HONKEN S & XL

**Design:** Thomas Bernstrand & Experiment 2015 - 2017

The Honken family started as a generously spacious armchair that also doubles as an intimate two-seater sofa, made of durable steel and expanded metal, and with turned legs of solid oak. What about everyone who thinks Honken is a tad too big as an armchair and everyone else who feels Honken is a little too small for a sofa? Well, we've solved that problem with an armchair that's smaller and a sofa that's bigger. Honken S as a one seater easy chair and Honken XL is a three seater sofa. With the hope of creating a true classic, the designer Thomas Bernstrand has given Honken all the conditions for a very long life.
