## 2017: BOB

---

# B

### Free flowing Bob

Shape Bob anyway you want. Let the totally adaptable sofa snake around pillars, flow along walls, and undulate around meeting areas. Bob will obediently adhere to any space, or will endow it with a forceful and at the same time immensely comfortable structure. Thanks to Thomas Bernstrand and Stefan Borselius' meticulously designed modular solution, Bob can be built straight, in hairpin turns, as a boomerang, or whatever shape one might fancy. Bob offers an architectonic freedom of free flows, and without any "back" side, Bob will face totally clothed in all directions opening up for even more possibilities when handling ever-changing interior architecture. The straightforward construction requires a minimum of maintenance: a frame in FSC-certified plywood with a sturdy yet soft mould of foam, and a broad selection of fabrics and colours.

At its launch in 2017 Bob was hailed as Best Product - Editor's Choice both at Stockholm Furniture Fair and ICFF in New York, and was then crowned with the German Design Award 2018. Bob has now become even more flexible with two new elements which allows for even more sensuous shapes as well as freestanding seating islands. New add-on steel tables can be affixed between the modular elements, or chose the freestanding Jack table, which can serve as a hub connected to the electric outlets on Bob. With an optional base in black stained oak, Bob can now be had as a slightly raised version for public spaces.

"We have made Bob even more useable," says Stefan Borselius, "the new elements allows for gentler curves and freestanding seating islands."

"The new 11,5 degree elements allows for seatings facing in all directions," claims Thomas Bernstrand, "you have an even greater flexibility in creating forms, and you can build little poufs as well."

## Bob Betong

A collaboration between Blå Station and Starka

Bob has been waiting to go outdoors since its successful launch in 2017. The free-flowing sofa for indoor use has now been adapted to all kind of seasons in a close collaboration between Blå Station and Starka, which has 80 years of experience in the manufacture of concrete for special applications. The heavy-duty version of Stefan Borselius and Thomas Bernstrand's meticulously designed modular sofa system will furnish public space all around the city with generous seatings for everyone. Have a break, eat your lunch, read a book, wait for a friend. Bob Betong will offer comfortable meeting places in parks, town squares and along sidewalks. The seating elements can be built in straight lines, placed at an angle or in zigzag-patterns which will allow for a major upgrade of the public sphere. Bob Betong's rounded soft forms will break up monotonous and anonymous surroundings, at the same time acting as a sturdy physical barrier protecting citizens on foot from invasive and stressful traffic. Bob Betong can be used to enrich new public spaces or give older ones a new life, while at the same time securing the city from all kind of threats. Bob Betong will also be at ease around entrances to companies as well as public institutions where the city as a place for growing together is enhanced. Bob Betong will contribute to a reborn public space where citizens will have the opportunity to conquer the city anew and create places for debate, meetings, and of course life itself.

Bob Betong is cast by the concrete manufacturer Starka in seating sections, which weigh in at 250 kilogram. Up to 9 Bob Betong can be attached together, and they can also be fixed into the ground or to concrete slabs. The close collaboration between Blå Station and Starka offers a solution that will furnish public space with accommodating seatings, which also acts as safety barriers with impact resistance. Bob Betong comes in concrete grey, but will be available in other colours for projects. The concrete is impregnated to give a resistant and maintenance free surface. Optional anti-graffiti coating is available.

# bob planner

# ööÅ

Check out our **BOB Planner** available on our website, [www.blastation.se](http://www.blastation.se) – it's ready to use! It will help you create all of the formations and variants you could possibly want. You can choose fabric or leather and select the colour combination. You can save your configuration as an image or a pdf with specification. You can send an e-mail with information and suggestion to someone or you can send an price inquiry directly to us.

Use the BOB Planner to create your desired variant and attach the illustration in the order as an image.

We also offer **CAD files** in all the standard formats such as DWG (both in 2d and 3d), 3DS, ArchiCad, Revit and SketchUp. These are to be found on our website and on BIMobject.com
